# American Mathematical Society 소개

학회소개 <https://www.ams.org/home/page>

- 수학 연구 및 학문 발전을 목적으로 1888년에 설립된 수학 전문 학회
- 미국 및 전 세계적으로 약 30,000명의 개인회원과 약 570개의 기관회원을 보유
- 수학분야 관련 출판, 컨퍼런스 개최, MathSciNet 제공 등을 통해 글로벌 수학 커뮤니티 지원

제공저널 소개 <https://www.ams.org/journals>

- 주제: 수학
- 제공 연도: 1891년-현재 (타이틀 별 상이)
- 타이틀 수: 4 종 (모두 Peer-reviewed Journal, SCI/SCIE 등재)

## Journals

AMS peer-reviewed journals are of the highest quality in mathematical research. Our journals have been published since 1891 and cover a broad range of mathematics. Each journal is managed by editors who are prominent in their fields, and each is unique in its offering of articles, book reviews, and reports. In addition to publishing and distributing printed journals, the AMS offers [searchable](#) electronic versions that are available prior to the print versions. When the journal is available in electronic format, the electronic version is considered the version of record. Get information on how to [subscribe](#) to our journals or browse our current [subscription rates](#).

**NEW!** AMS journal contributors receive 15% off Charlesworth's specialist language editing and [publication support services](#).

**All articles submitted to journals published by the AMS are peer-reviewed.** The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the peer reviewers are. Questions about the initial submission process should be directed to [jrnlnitsub@ams.org](mailto:jrnlnitsub@ams.org).

*Mathematics of Computation* is devoted to research articles of the highest quality in computational mathematics. Areas covered include numerical analysis, computational discrete mathematics, including number theory, algebra and combinatorics, and related fields such as stochastic numerical methods. Articles must be of significant computational interest and contain original and substantial mathematical analysis or development of computational methodology. Published six times per year in both print and electronic formats.

An algorithmic approach to Chevalley's Theorem on images of rational morphisms between affine varieties  
( [view abstract](#) )

**An algorithmic approach to Chevalley's Theorem on images of rational morphisms between affine varieties**

The goal of this paper is to introduce a new constructive geometric proof of the affine version of Chevalley's Theorem. This proof is algorithmic and a verbatim implementation resulted in an efficient code for computing the constructible image of rational maps between affine varieties. Our approach extends the known descriptions of uniform matrix product states to  $\text{uMPS}(2, 2, 5)$ .

Stable broken  $\mathbf{H}(\mathbf{curl})$  polynomial extensions and  $p$ -robust a posteriori error estimates by broken patchwise equilibration for the curl--curl problem  
( [view abstract](#) )

**Stable broken  $\mathbf{H}(\mathbf{curl})$  polynomial extensions and  $p$ -robust a posteriori error estimates by broken patchwise equilibration for the curl--curl problem**

We study extensions of piecewise polynomial data prescribed in a patch of tetrahedra sharing an edge. We show stability in the sense that the minimizers over piecewise polynomial spaces with prescribed tangential component jumps across faces and prescribed piecewise curl in elements are subordinate in the broken energy norm to the minimizers over the broken  $\mathbf{H}(\mathbf{curl})$  space with the same prescriptions. Our proofs are constructive and yield constants independent of the polynomial degree. We then detail the application of this result to the a posteriori error analysis of the curl--curl problem discretized with  $N^d$  finite elements of arbitrary order. The resulting estimators are reliable, locally efficient, polynomial-degree-robust, and inexpensive. They are constructed by a broken patchwise equilibration which, in particular, does not produce a globally  $\mathbf{H}(\mathbf{curl})$ -conforming flux. The equilibration is only related to edge patches and can be realized without solutions of patch problems by a sweep through tetrahedra around every mesh edge. The error estimates become guaranteed when the regularity pick-up constant is explicitly known. Numerical experiments illustrate the theoretical findings.

**HALF-SPACE TYPE THEOREM FOR TRANSLATING SOLITONS  
OF THE MEAN CURVATURE FLOW IN EUCLIDEAN SPACE**

DAEHWAN KIM AND JUNCHEOL PYO

(Communicated by Guofang Wei)

**ABSTRACT.** In this paper, we determine which half-space contains a complete translating soliton of the mean curvature flow and it is related to the well-known half-space theorem for minimal surfaces. We prove that a complete translating soliton does not exist with respect to the velocity  $v$  in a closed half-space  $\mathcal{H}_{\tilde{v}} = \{x \in \mathbb{R}^{n+1} \mid \langle x, \tilde{v} \rangle \leq 0\}$  for  $\langle v, \tilde{v} \rangle > 0$ , whereas in a half-space  $\mathcal{H}_{\tilde{v}}$ ,  $\langle v, \tilde{v} \rangle \leq 0$ , a complete translating soliton can be found. In addition, we extend this property to cones: there are no complete translating solitons with respect to  $v$  in a right circular cone  $C_{v,a} = \{x \in \mathbb{R}^{n+1} \mid \langle \frac{x}{\|x\|}, v \rangle \leq a < 1\}$ .

Half-space type theorem for translating solitons of the mean curvature flow in Euclidean space

Daehwan Kim and Juncheol Pyo

Abstract

In this paper, we determine which half-space contains a complete translating soliton of the mean curvature flow and it is related to the well-known half-space theorem for minimal surfaces. We prove that a complete translating soliton does not exist with respect to the velocity  $v$  in a closed half-space  $\mathcal{H}_v = \{x \in \mathbb{R}^{n+1} \mid \langle x, \bar{v} \rangle \leq 0\}$  for  $\langle v, \bar{v} \rangle > 0$ , whereas in a half-space  $\mathcal{H}_v, \langle v, \bar{v} \rangle \leq 0$ , a complete translating soliton can be found. In addition, we extend this property to cones: there are no complete translating solitons with respect to  $v$  in a right circular cone  $C_{v,a} = \{x \in \mathbb{R}^{n+1} \mid \langle \frac{x}{\|x\|}, v \rangle \leq a < 1\}$ .

## AMS Journals Email Notification Program

Welcome to the American Mathematical Society's email alert service. This is a free service available to anyone wishing information on recently posted research articles in AMS electronic journals. To sign up you only need a valid email address. More information on using the Journal Email Notification Program is available.

Manage your email alerts	
Enter email address:	<input type="text"/>
Issue notification	Subscribe or Change
Article notification	Subscribe or Change

This system will deliver weekly email notification of

- Articles are posted to a journal or set of journals
- Articles are posted containing a selected MSC
- Articles are posted under any combination of
- A full journal issue is posted

The following journals are covered in the Email N

- Bulletin of the American Mathematical Society
- Communications of the American Mathematical Society
- Conformal Geometry and Dynamics
- Journal of the American Mathematical Society
- Mathematical Reviews Sections (issue notification only)
- Mathematics of Computation
- Notices of the American Mathematical Society (issue notification only)
- Memoirs of the American Mathematical Society
- Proceedings of the American Mathematical Society
- Proceedings of the American Mathematical Society, Series B
- Representation Theory
- Transactions of the American Mathematical Society
- Transactions of the American Mathematical Society, Series B

Analysis	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Applications	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Differential Equations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Discrete Mathematics and Combinatorics	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
General and Interdisciplinary	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Geometry and Topology	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Logic and Foundations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Mathematical Physics	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Number Theory	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Probability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Hyperlinks from the subject areas lead to a [Help File](#) that fully enumerates the subject classifications residing under the eleven subject areas. Links from the journal title abbreviation lead to journal home pages.

# Open Access 저널

<https://www.ams.org/publications/journals/open-access/open-access>

## AMS Gold Open Access Journals

### Gold Open Access

저널 발행 비용(Article Processing Charge)을 후원 기관이나 저자의 기관에서 부담한 저널로 출간되자마자 AMS 웹페이지에서 무료로 제공되는 저널

## AMS Green Open Access Journals

### Green Open Access

저자의 개인 웹페이지, 기관 레포지토리, arXiv.org 등에 발행 전 논문 게재 가능  
AMS의 구독 Research Journal은 모두 Green Open Access Journal

## AMS Diamond Open Access Journals

### Diamond Open Access

Communications of the American Mathematical Society 2021년에 런칭  
무료로 제공되며, APC 없이 출판 가능

# Remote Access - Mobile 기기 이용 안내

<http://www.ams.org/publications/remotearchive>

## 모바일 기기 Pairing

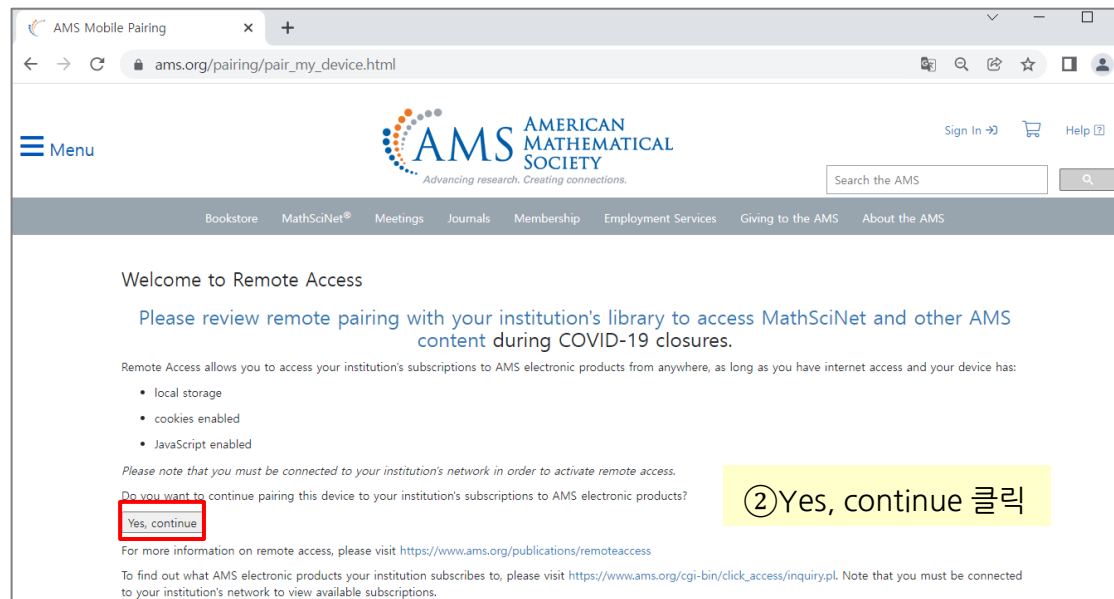

- 기관의 네트워크에 연결된 상태에서 Pairing 하고자 하는 기기의 브라우저에서 'Remote Access' 아이콘 클릭 후 아래 단계 진행
- 기관 소속 이용자만 이용 가능 (authorized user)
- Pairing 이 완료되면 관외에서 기관이 구독하는 콘텐츠에 액세스 가능
- 브라우저 별로 설정됨 (Chrome을 이용해 Pairing하면 Chrome을 통해서만 Remote Access 가능)
- Pairing 은 90일 동안 지속되며, 만료 시 다시 설정 가능

①저널 이용 페이지 왼쪽 상단에  아이콘 클릭 또는 아래 URL에 접속

[https://www.ams.org/pairing/pair\\_my\\_device.html](https://www.ams.org/pairing/pair_my_device.html)

[http://www.ams.org/pairing/pair\\_my\\_device\\_mobile.html](http://www.ams.org/pairing/pair_my_device_mobile.html)

## AMS Remote Access License Agreement

You are requesting remote access of this device with the network of Iona Coll. By clicking 'Accept' below, you agree to the posted terms and conditions of use of AMS electronic products, and you confirm that you are an authorized user as per the terms and conditions of the signed license agreement(s) of the subscribing institution with which you are pairing. Note that any violation of the posted terms and conditions of the signed license agreement(s) of the subscribing institution will result in the termination of your remote access.

For more information on remote access, please visit <https://www.ams.org/publications/remotearchive>

To find out what AMS electronic products your institution subscribes to, please visit [https://www.ams.org/cgi-bin/click\\_access/inquiry.pl](https://www.ams.org/cgi-bin/click_access/inquiry.pl). Note that you must be connected to your institution's network to view available subscriptions.

③Accept 클릭

→ Pairing 완료 메시지 확인 (90일 이용가능)

# Remote Access - Mobile 기기 이용 안내

대부분의 스마트폰 및 태블릿에서 이용 가능(아래 기본 사양 필수)

- Cookies 허용
- Javascript 활성화
- localStorage 가능 : 데이터를 사용자 로컬에 보존하는 방식, 브라우저가 닫히거나 다시 열려도 유지
- 개인정보 보호 브라우징 (private browsing) 모드 끄기
- 인터넷 연결
- 브라우저 별로 설정됨 (Chrome을 이용해 Pairing하면 Chrome을 통해서면 Remote Access 가능)

감 사 합 니 다.
